Code of Practice for Breeding, Rearing and Education

Date policy was made
19 June 2015

Commencement date of this version
1 December 2015

Application
This Code applies to persons who breed, rear or educate greyhounds.

Purpose
This Code is designed for participants who breed, rear or educate greyhounds. This Code provides an overarching framework for breeders, rearers and educators and specifies the minimum standards of accommodation, management and care for greyhounds.

The overriding theme of this Code is that the well being of the greyhound must at all times be considered above the demands of owners, breeders, trainers, sponsors, wagering operators, punters and spectators.

By adhering to this Code, persons involved in the greyhound industry can demonstrate to the general community their commitment to uphold the welfare of the animals in their care.

Background
This Code provides an overarching framework for breeders, rearers and educators by specifying the minimum standards of accommodation, management and care to uphold the welfare of greyhounds. It is not a comprehensive manual to care for a greyhound.

It is acknowledged that the specific needs of a greyhound vary throughout its lifecycle. Participants involved in the training of greyhounds should refer to the Code of Practice for the Keeping of Greyhounds in Training.

This Code is drawn from relevant NSW Codes including the Animal Welfare Code of Practice – Breeding Dogs and Cats, the NSW Animal Welfare Code of Practice No. 5 – Dogs and Cats in Animal Boarding Establishments and GRNSW’s Code of Practice for the Keeping of Greyhounds in Training.

The Code emphasises the importance of best practice management and refers to rules and regulations that persons in charge of greyhounds must abide under the GRNSW Greyhound Racing Rules which are made under the Greyhound Racing Act 2009 (NSW). For the purposes of this Code, the person in charge may be the licensed trainer, owner or other licensed persons who has the care and control of the greyhound.
Compliance with this Code does not remove the need to abide by the requirements of the Prevention of Cruelty to Animals Act 1979 (NSW), the Prevention of Cruelty to Animals Regulation 2012 (NSW), the Local Government Act 1993 (NSW), the Companion Animals Act 1998 (NSW), the Companion Animals Regulation 2008 (NSW) or any other laws and regulations, including local government regulations relating to animals.

Persons should be familiar with their responsibilities under these laws and regulations. The responsibility for compliance rests with the person in charge of the greyhound and GRNSW will not be held responsible for any omissions or non-compliance.

Policy

1. Guiding Principles

1.1. This Code sets standards for the care and management of greyhounds on breeding, rearing and education premises to ensure their basic needs are met.

1.2. For the purpose of this Code, premises include land, buildings fixed or moveable, including motor vehicles used for the purpose of breeding, rearing or educating greyhounds.

1.3. The basic needs of greyhounds are:

- Readily accessible food and water in sufficient quantities to maintain health and vigour;
- Freedom of movement to stand, stretch and lie down;
- Regular exercise;
- Shelter and accommodation that provides protection from the weather;
- Regular inspections to assess the need for veterinary care;
- Internal and external parasite control; and
- Rapid identification and treatment of injury and disease.

1.4. For the purposes of this Code, Manager refers to the person being in charge of a breeding, rearing or education premises.

1.5. A Manager must be licensed in accordance with the GRNSW Greyhound Racing Rules to breed, rear or educate a greyhound.

1.6. A Manager is responsible for the:

- provision of accommodation and equipment which suits the physical and behavioural requirements of the greyhounds held;
- protection of greyhounds from people, other animals or adverse environmental conditions;
- provision of sufficient space for greyhounds to stand, move around freely, stretch fully and rest;
- provision of sufficient quantities of appropriate food and water to maintain good health;
- protection of greyhounds as far as possible from disease, distress and injury;
• provision of prompt veterinary or other appropriate treatment in cases of illness or injury;
• maintenance of hygiene of the premises and health of the greyhounds held;
• the supervision of daily feeding, watering and inspection of greyhounds held to ensure their well-being; and
• the collation and maintenance of relevant treatment records for each greyhound in the Manager’s care.

1.7. When greyhounds are admitted to a breeding, rearing or education premises, Managers must ensure that owners are made aware of this Code by referring to it in the agreement which sets out the terms for greyhounds being accepted onto the premises.

2. Greyhound Housing Areas Construction

2.1. For the purposes of this Code, greyhound housing areas are any enclosed spaces in a breeding, rearing or education premises used to house greyhounds. It may include a kennel, yard or rearing pen.

2.2. Prior to constructing greyhound housing areas, Managers should consult with their local council in relation to any requirements for the keeping of greyhounds or construction of kennels in their local council area. Managers should also determine:

• the number of greyhounds to be kept in the greyhound housing area;
• the type, construction and finishes of the greyhound housing areas and any local government restrictions;
• the intended purpose of the greyhound housing areas e.g. rearing, breeding;
• the distance of all greyhound housing areas to boundaries and dwellings on adjoining properties;
• provision for noise and odour abatement;
• provision for the management and disposal of solid/liquid wastes and water runoff.

2.3. The location of kennels should be away from sources of noise or pollution that could cause injury or stress to the greyhound and out of areas that are prone to flooding and/or bushfires.

2.4. Greyhound housing areas must be constructed, serviced and maintained in a way that maintains the good health and wellbeing of greyhounds, prevents the transmission of infectious disease agents, prevents the escape of greyhounds and does not cause injury risk to either greyhounds or humans.

2.5. Greyhound housing areas must be constructed away from other establishments that house other animals (for example, agricultural livestock) through appropriate fencing.

2.6. Vehicles, caravans, trailers, portable crates or the crawl space under any dwelling must not be used to house greyhounds.
2.7. The internal surfaces of greyhound housing areas must be constructed of impervious, solid, washable materials. Wall/floor junctions should be sealed to facilitate cleaning and disinfection.

2.8. Floors of greyhound housing areas should be made of an impervious material to assist cleaning and drainage. Sealed concrete or sealed brick is ideal and should ideally be covered with straw that is replaced frequently.

2.9. Individual spaces within greyhound housing areas must be separated by solid partitions, galvanised mesh or chain wire dividers.

2.10. Grassed or landscaped sections may form part of large outdoor greyhound housing areas but must be adequately maintained and not allowed to deteriorate into bare earth.

3. Greyhound housing area size

3.1. Greyhound housing areas should provide at least enough space for each animal to feed, sleep, sit, stand, lie with limbs extended, stretch and move about.

3.2. Housing should be of sufficient height to permit effective cleaning.

3.3. Greyhound housing areas should meet the following requirements:

   **Racing Kennel – Minimum size = 3 sq.m (e.g 2m x 1.5m)**
   
   An enclosure for housing a single greyhound generally situated within a secure building and designed to encourage the greyhound to rest. The minimum width of a housing area for an adult greyhound shall be no less than 1.2 metres.

   Fencing should be appropriately constructed and well maintained fencing mesh being 1.8 meters high on a concrete or fixed base.

   Posts may be steel and/or wood. Fencing should be strained as appropriate to ensure the security of the greyhound.

   **Day / Spelling Yard – Minimum size not less than 6sq.m – (if provided)**
   
   A wire mesh enclosed space and often with an associated kennel, where a single greyhound may spend short periods of time recuperating outdoors.

   Fencing should be a minimum of 1.7m and further 0.1m should be buried into the ground to prevent digging and escape.

   Provision for shade either natural or a permanent structure must be provided.

   **Exercise Yard – (if provided)**
   
   A series of two or more fenced enclosures used to exercise greyhounds adjacent to each other. Each yard is generally 30 to 50m in length and 3 to 4 m wide but may vary in shape dependent on site characteristics.
Fencing should be a minimum of 1.2m high. Consideration should be given for shading to be provided if greyhounds are to be exposed for an extended period of time.

**Rearing yards**

Rearing yards must include a housing area constructed as well as access to external shade areas to accommodate the number of greyhounds housed.

The number of greyhounds housed in rearing pens or yards should not exceed:

3.4. A litter may be housed together until the pups are 16 weeks old. After 16 weeks a litter may still be housed together however the Manager is responsible for ensuring inhabitants are protected from the risk of harassment or injury by others in the pen.

3.5. If the Manager has more than six greyhounds housed together, written consent by the owner must be obtained. Managers are required to monitor dams on a regular basis for coming onto season from nine months of age and segregate as necessary.

3.6. Pups housed together should be the same age and, ideally, from the same litter. The Manager is responsible for matching temperaments of greyhounds to minimise risk. Where a dog is identified as a risk to other greyhounds, it must be housed separately.

4. **Security Standards**

4.1. Greyhound housing areas must be reasonably secure and adequate fencing must exist to prevent escape of greyhounds and prevent access by unauthorised people.

4.2. Greyhound housing areas must be fitted with a secure closing device that cannot be opened by greyhounds. Double barriers (a secure area outside the greyhound housing area) are recommended to prevent the escape of greyhounds.
4.3. Any security methods used must allow for ready access by staff to greyhounds and ready exit of staff and greyhounds from the premises in the event of an emergency.

4.4. Fire safety equipment must be readily available and an emergency exit plan as required.

4.5. All potential poisons and harmful substances, whether in storage or use, must be kept secure and out of reach of greyhounds.

4.6. Prescribed veterinary products should be kept secure with all treatments administered recorded for each greyhound.

5. Environment

5.1. Greyhounds must be provided with protection from rain and wind, direct sunlight or other adverse weather conditions and trainers must comply with GRNSW’s Hot Weather Guidelines.

5.2. Where kennels are constructed outdoors, they must protect the greyhound from the rain and wind and be partially enclosed to provide sheltered sleeping areas.

5.3. Where kennels are constructed indoors, the environment should be controlled to ensure the comfort of the greyhound, inclusive of indoor temperature, humidity and appropriate ventilation. Lighting should be as close as possible, in duration and intensity, to natural conditions.

5.4. Despite 5.2 and 5.3, very old and very young greyhounds are more sensitive than others to changes in temperatures and may require heating or cooling.

5.5. Natural lighting is the preferred for greyhound housing areas, provided shaded areas are available to protect greyhounds from extreme lighting conditions. Artificial light should also be available in greyhound housing areas so that they can be thoroughly cleaned in the evenings and greyhounds can be attended to.

5.6. Where natural lighting is not possible, artificial lighting should be used and be similar in duration and intensity to natural lighting.

5.7. Greyhound housing areas should be adequately ventilated to minimise undue draughts, odours and moisture condensation. Greyhounds must not be in contact with wet floors for extended periods of time.

5.8. Measures should be in place to reduce the impact of sudden noise.

5.9. Noise from barking greyhounds should be managed to comply with local government noise regulations and may be managed by:

- Positioning kennels so that they do not face each other;
- Limiting external stimulation by placing partitioning between kennels or using blinds;
- Holding greyhounds singly or in compatible pairs;
- Turning lights off after feeding;
- Exercising greyhounds away from greyhound housing areas.

5.10. The extended use of barking muzzles is not permitted.

5.11. The use of barking muzzles at race tracks is strictly prohibited.

6. Bedding

6.1. Greyhounds must be provided with a clean and dry dedicated sleeping area, with flooring to be of fixed construction or concrete. Outdoor greyhound housing must be partially enclosed to provide greyhounds with sheltered sleeping areas that can protect them from the rain and wind.

6.2. All greyhounds should be provided with raised wooden sleeping boards, dog houses or trampoline-style beds to insulate them from the floor. Sleeping areas and bedding must be regularly kept clean, hygienic and dry and bedding and blankets should be changed frequently.

7. Hygiene and cleaning

7.1. Greyhound areas must be kept clean so that diseases are controlled and greyhounds are comfortable. Greyhound areas should be left dry after cleaning and be dried with a mop or squeegee.

7.2. Cleaning and disinfecting agents should be chosen on the basis of their suitability, safety and effectiveness. Manufacturer's instructions for the use of cleaning and disinfecting agents must be followed keeping in mind that solutions that are diluted too much may be ineffective solutions that are too concentrated may be toxic.

7.3. Urine and faeces should be removed at least once a day from greyhound housing areas and exercise areas.

7.4. Housing and exercise areas should be cleaned daily, and disinfected at least once each week, before new puppies or greyhounds are introduced. Kennel enclosures should be disinfected at least once a week with practices in place to minimise odour from kennels. Food preparation and storage areas must be maintained in a hygienic standard.

7.5. Urine, faeces and food wastes must be disposed of promptly and hygienically and in accordance with local government requirements. Floors of outdoor greyhound housing areas should be slope to enable waste and water to run off. External yards should be designed to minimise run off and potential contamination. A collection drain may be provided and fitted with fine mesh wire baskets to trap hair and waste. The baskets should be cleaned daily.

7.6. Use of a trade waste service for collection and disposal of wastes is preferred. Waste should not be incinerated on-site.
8. Pest Control

8.1. Effort must be made to effectively control pests, including flies, fleas, mosquitoes and rodents.

8.2. Chemicals used for vermin control must be registered under relevant Commonwealth and NSW agriculture and veterinary chemicals legislation as highlighted on the labels, and used only in accordance with manufacturer's instructions.

8.3. Because greyhounds and humans may be adversely affected by pest control agents, expert advice should be sought before pest control operations are carried out.

9. Nutrition

9.1. Greyhounds should be provided with adequate amounts of good quality food and fresh clean drinking water daily to maintain optimal health at all times.

9.2. All food should be stored in a secure hygienic area. A variety of foods should be supplied.

9.3. Adult greyhounds must be fed daily. Pregnant and lactating greyhounds, pups up to 6 months of age, should be fed twice daily.

9.4. Pregnant and lactating greyhounds require approximately twice the amount of food required normally.

9.5. Food should be prepared hygienically and served in appropriate containers, i.e. non-chewable and non-spillable bowls. They must be readily accessible, positioned to avoid spillage and contamination by urine or faeces, and must be cleaned daily.

9.6. Food should be stored appropriately, with dry food kept in a rodent-free place and fresh meat kept refrigerated.

9.7. Uneaten food should be removed and disposed of promptly so that it does not spoil or attract pests.

9.8. Fresh water in non-spillable containers must be available at all times.

10. Exercise

10.1. Greyhounds must have the opportunity once or twice a day for exercise to:
  • allow them to be checked over;
  • allow them to stretch their limbs; and
  • give them contact with humans.

10.2. Exercise can be provided by walking greyhounds on a lead for a minimum of 30 minutes once daily or 15 minutes twice daily. Very active, very old or injured greyhounds may require more or less exercise than the above.
10.3. If the greyhound is not being raced it should be given an opportunity to be exercised in suitable exercise areas. Measures should be in place to minimise the deterioration of exercise areas to bare earth, i.e. returf, concrete or suitable animal flooring.

10.4. When greyhounds are walked on the footpath of busy roads handlers should take extra care to ensure that the greyhounds are safe from escaping into the path of vehicles. A walking machine can be used to assist in exercising greyhounds but should not be seen as a replacement for outdoor walking and environmental stimulation.

11. Health and Veterinary Care

11.1. Before a greyhound is admitted, the following information should be recorded:

- The greyhounds registered name;
- Name, address and telephone number of its owner;
- Expected date of collection by owner;
- A description of the greyhound including:
  - Sex
  - Breed
  - Microchip
  - Earbrand
  - Colour
  - Age
  - Distinguishing Features
  - Condition and weight
- All health records including vaccination status and heartworm prevention status;
- Details of medical and dietary requirements; and
- Name and contact telephone number of a veterinarian who normally attends the greyhound.

11.2. Each greyhound should be checked at least once daily to monitor its health and comfort. Any changes in health status should be recorded and promptly addressed.

11.3. The person checking the greyhound should note whether each greyhound:

- is eating;
- is drinking;
- is defecating;
- is urinating;
- is behaving normally;
- is of normal appearance;
- is able to move about freely; and
- has a normal coat.

11.4. Owners of greyhounds must be asked to sign an agreement authorising provision of necessary veterinary treatment. The Manager should liaise with a veterinary practitioner to provide advice and treatment as required. The veterinary practitioner must be able to attend to any greyhounds in his or her care, and advise on disease prevention measures.
11.5. Immediate veterinary care must be provided for sick or injured greyhounds, to relieve pain, suffering and distress. Veterinary attention must be sought by for any greyhounds showing any of the following conditions:

- Runny nose;
- Repeated sneezing;
- Coughing;
- Runny, discharging or inflamed eyes;
- Inability to stand or walk;
- Lameness (i.e. disturbance in ability to move);
- Apparent pain;
- Fits or staggering;
- Extreme lassitude (i.e. lack of energy);
- Vomiting;
- Severe diarrhoea, especially if bloodstained;
- Inability to urinate or defecate;
- No appetite;
- Bloating of abdomen;
- Weight loss; and
- Bleeding or swelling of body parts (other than the vulva of a female on heat).

12. Disease Prevention

12.1. Greyhounds must be vaccinated in accordance with the GRNSW Greyhound Racing Rules or as directed by GRNSW in consultation with a veterinarian. Vaccination against distemper, hepatitis, parvovirus and canine cough is required (C5). A current vaccination certificate (certifying that vaccination was completed in the preceding 12 months) must be produced for each greyhound before admission.

12.2. Internal and external parasites must be controlled through routine preventative treatments.

12.3. All greyhounds are to be protected from distress or injury caused by other greyhounds and:

- Greyhounds known or suspected to be suffering from an infectious disease should not be admitted to the premises;
- Greyhounds that are suspected or have been diagnosed as having an infectious disease must be isolated in facilities either within the greyhound premises or at a veterinary premises.

12.4. Due to the mobile nature of greyhounds, Managers of breeding, rearing or education facilities are required to advise GRNSW of any suspected outbreak of an infectious disease and take immediate steps to isolate the suspected greyhound(s) until the infection is formally diagnosed by a veterinarian.

12.5. Under Greyhounds Australasia Rule 84A, the person in charge of a greyhound must keep and retain records on all vaccinations, worming and medical treatments administered to a greyhound from the time the greyhound enters their care until the time the greyhound leaves their care. A person in charge of a greyhound will be required to keep and retain treatment records for a period of two (2) years.
12.6. Managers of breeding, rearing and education facilities are required to keep records for all greyhounds under their care. It is expected that the treatment records are kept at the Manager’s premises and it is not the intention of Stewards to request this record of treatment at a race meeting. If the record is requested outside of a facility inspection, GRNSW will allow sufficient time for the person to produce the record.

13. Transport

13.1. Greyhounds may be transported to training sites, exercise sites, veterinary visits, or other appropriate purposes. Managers must ensure that at all times greyhounds are transported in a way that does not to cause injury or stress and in the shortest practicable time.

13.2. Any vehicle especially designed or regularly used for transporting greyhounds should:
   - Protect greyhounds from injury during transportation;
   - Have non-slip floors;
   - Have enough room for the greyhound to adequately stretch in a standing position and lie down comfortable during transport;
   - Provide easy access and operator safety;
   - Protect against extremes of temperature;
   - Protect against escape of greyhounds; and
   - Be easy to clean and disinfect.

13.3. Suitable modes of transport for greyhounds include:
   - Enclosed trailers - insulated and ventilated;
   - Appropriately sized cars with owner or handler; and
   - Rear compartments of station wagons.

13.4. Modes of transport that are not suitable include:
   - Wire cages in trailers or utilities which are open to the elements; and
   - Non-ventilated or non-insulated trailers.

13.5. Before the commencement of each trip, the Manager must ensure that the mode of transport is in a sanitary condition. It must also be kept in a clean condition for the entire duration of each trip.

13.6. Managers must ensure that good quality water is provided to each greyhound at least every six hours, or more frequently on hot or humid days. Provision of electrolytes should also be considered in extreme hot or humid conditions.

13.7. A greyhound should not be kept in a mode of transport for more than 6 hours without breaks provided. A break should consist of being let out of the mode of transport for at least ten minutes.

14. Euthanasia

14.1. Euthanasia should only be considered where a greyhound becomes seriously ill or injured and where it is recommended by a veterinarian who has examined the greyhound.
14.2. Permission from the greyhound owner or nominee, preferably in writing, must be obtained.

14.3. Euthanasia should only be performed by a veterinarian by the intravenous administration of an overdose of pentobarbitone sodium unless there are compelling reasons to use another method to humanely kill the greyhound.

14.4. The use of firearms to kill animals should be limited to emergency situations only. Where firearms are used, operators must be appropriately licensed, trained and experienced, and animals must only be humanely destroyed in areas away from the sight and hearing of other animals and the public.

14.5. In accordance with Greyhounds Australasia Rule 106 (3), the last registered owner of the greyhound must notify GRNSW within two working days if a greyhound has been humanely euthanised by a veterinary surgeon by lodging the prescribed form.

14.6. The method of disposal and/or location of burial must be recorded and documented by the Manager.

15. Training and Educating Greyhounds

15.1. Training facilities must be constructed and maintained to minimise risks to greyhounds and persons.

15.2. All equipment used in association with greyhound education or training must be recorded in a facility register. This register should be updated when equipment is maintained or repaired. Examples of equipment may include:

- lures, quarry or baits;
- bullrings;
- slipping tracks;
- walking machines; and
- starting boxes.

15.3. The use of any live animal, animal carcass or part of an animal in greyhound education, training or racing is strictly prohibited.

15.4. A lure is defined under the Greyhounds Australasia Rules as any item, natural or man-made, that is used in any way for the purposes of encouraging or enticing a greyhound to pursue, attack or excite it in response. The terms quarry and bait have the same meaning. The Manager is only permitted to use lures approved by GRNSW.

15.5. GRNSW approves lures that:

- are made up of synthetic materials only; and
- may contain an audible device.

15.6. “Synthetic materials” means non-animal derived materials. As such, the use of any live animal, animal carcass or part of an animal (including for example animal-
derived wool, fur, feathers or tanned and professionally processed skin) as a lure in greyhound training, education or racing is strictly prohibited.

15.7. A Manager must take reasonable steps to ensure that a greyhound does not pursue or attack any live animal. This includes ensuring that there are no other animals present on the same property where greyhounds are housed.

15.8. Where any animal other than a greyhound is kept at the premises as a domesticated pet or is kept for rural or agricultural purposes, the Manager must notify GRNSW by completing the animal declaration form.

15.9. Managers must notify GRNSW of permanent domestic pets on the premises. Domestic animals kept as pets must be identified by microchip if required under the Companion Animals Act 1998 (NSW). Further, Managers must notify GRNSW if they own a property where greyhounds are trained and cattle, sheep or other livestock are bred or reared. Where a person is conducting an agricultural business, there must be a clear and secure delineation between the greyhound and livestock areas.

15.10. Managers are not expected to notify GRNSW of each and every instance where animals appear on the property. For example notification may not be required or expected:

- on occasions where stray animals such as kangaroos or cats appear on the premises; or
- for the exact numbers of animals used for rural or agricultural purposes.

15.11. Where Managers are in doubt, they should declare all relevant information to GRNSW by completing the animal declaration form.

16. Breeding Guidelines

16.1. Breeding a greyhound should be a considered and informed decision.

16.2. Breeding practices should ensure that both breeding greyhounds and the offspring they produce are as physically and behaviourally sound and healthy as possible.

16.3. Licensed greyhound breeders have a responsibility to ensure that their breeding animals maintain the best quality of life possible, and litters should only be produced with a reasonable expectation of racetrack success.

16.4. Greyhounds which are well socialised to human adults and children and with other animals will become well-adjusted companions. The best opportunity to socialise puppies to humans is before 12 weeks of age.

16.5. Breeders should consider the welfare of their breeding sires and dams when deciding on the best time to re-breed or to cease breeding their animals in accordance with Greyhounds Australasia Rules.

16.6. Breeding females must not whelp more than two litters in any 18 month period. Further, Managers will need to seek approval from GRNSW for a female to breed a
fourth litter or breed over the age of eight years of age.

16.7. When greyhounds reach the end of their breeding life, or when mature breeding stock is found to be in some way unsuitable for breeding purposes, it is the responsibility of the Manager to:

- have such greyhounds desexed;
- retain responsibility for the greyhound until a satisfactory home is established;
- notify GRNSW in accordance with GAR 106(3).

17. Breeding Standards

17.1. Mating, breeding, whelping and rearing processes should be managed in a way that assures good greyhound welfare outcomes and in accordance with the GRNSW Greyhound Racing Rules and GRNSW polices.

17.2. A greyhound must be registered as a current breeding greyhound, physically and mentally fit, healthy and free of disease at the time of being mated.

17.3. The breeder and or person whelping the litter must be licensed in accordance with the GRNSW Greyhound Racing Rules.

17.4. During mating, breeding pairs must be isolated from other animals and monitored by the Manager.

17.5. Breeding females in the latter stages of pregnancy must be provided with additional access to food and water, provided at frequent intervals.

17.6. During birthing, breeding females must be isolated from the remaining breeding population and monitored by the Manager on a regular basis to ensure that the birth proceeds in a normal manner.

17.7. Whelping females should be provided with a suitable whelping area that will prevent the escape of puppies but allow the egress of the mother. The whelping area should be easily cleaned and include bedding which is changed daily.

17.8. Whelping and lactating houses must be maintained at a temperature between 10 and 32 degrees Celsius.

17.9. After delivery of a litter, the mother and young should be health checked and where required, veterinary assistance sought. The birthing area should be cleaned and disinfected.

17.10. Greyhounds that are isolated from the remaining breeding population must be provided with additional attention and monitoring from the Manager.

17.11. Lactating females must be provided with additional food and water.

17.12. Lactating females must be housed in such a manner that they are able to escape their young.
17.13. Puppies must not be separated from their litter or their lactating mother until they are seven weeks of age to facilitate socialisation, except in the best interests of the puppy, or their mother.

17.14. Solid food must be offered to puppies from three weeks of age. Puppies must be monitored when first offered solid food to ensure that the food is acceptable and palatable. If necessary, solid food may require moistening or softening to increase palatability.

17.15. Puppies must be observed to ensure that they achieve a steady weight gain every week. Any puppy which does not achieve a regular weight gain should be referred for veterinary consultation.

17.16. Puppies should learn to urinate and defecate away from the nesting area. It is easier for greyhounds to learn this behaviour at a young age.

18. Standard Agreements

18.1. GRNSW strongly recommends that all Managers enter into a formal agreement with their clients to help avoid disputes and potential legal action in the future.

18.2. To assist both Managers and their clients, GRNSW has developed a standardised training agreement and a standardised rearing agreement template.

18.3. This is a template that both parties can use to document any finalise the terms of any training arrangements.

18.4. These templates are available under at GRNSW's website at www.thedogs.com.au.

Consequences of a breach of this policy

A failure to comply with this policy may result in the imposition of a penalty under the GRNSW Greyhound Racing Rules. The maximum penalty that may be imposed is $22,000 or suspension, disqualification and/or cancellation of registration.

Registered participants should make themselves familiar with the GRNSW Racing Rules. Managers in particular should be aware of the Rules specific to all racing matters, including breeding, incapacitations and prohibited substances. Please note that these Rules are continually amended. All amendments are undertaken through the co-operation of all affiliated greyhound racing bodies as well as Greyhounds Australasia.

Definitions

In this policy:

**Code** means the Code of Practice for the Breeding, Rearing and Education.
Manager means a person registered with GRNSW and who is in charge of premises at which greyhounds are bred, reared or trained;

Premises means any land, buildings (whether fixed or moveable) or motor vehicle used for the purpose of breeding, rearing or educating greyhounds; and

Rules mean the GRNSW Greyhound Racing Rules.

Amendments to, and operation of, this policy
GRNSW reserves the right to amend this policy at any time.
